AC / DC DRIVE CONTROL REPAIR

K+S has over 30 years of experience repairing all types of AC / DC frequency & servo drives. We have designed in our Engineering group, over 100 dedicated test stands to ensure a quality repair. In addition, we have also designed a special dynamometer that allows two motors to work against each other; this provides a dynamic load test allowing us to make performance and rating adjustments to exactly the right levels. Below is a list of the Manufacturers we are currently supporting globally within our repair labs.
