

NEW REPAIR & SYSTEM TEST CAPABILITY

Fanuc Alpha HVi Series Drive System

Technical Bulletin

This is the Fanuc Alpha HVi series AC drive system. K+S Kokomo is pleased to announce this Fanuc drive control system as it's newest test capability. The main system components consist of a Fanuc PSM-100HVi 480VAC main power supply (A06B-6120-H100) a SPM-45HVi AC spindle drive (A06B-6121-H045) a SVM1-40HVi single axis servo drive module (A06B-6124- H104) and a SVM2-80/80HVi dual axis servo drive module (A06B-6124-H209) as well.

All of these servo & spindle drives are ran under the closed loop control of a Fanuc Powermate Di CNC system.

12 Month In-Service Warranty

All Units Are System Tested

No Charge Evaluation
