

NEW REPAIR & SYSTEM TEST CAPABILITY

Modicon PLS4 & Model 410 Servo System

Technical Bulletin

This is the Modicon Model 410 intelligent motion servo positioning system. They are general purpose industrial positioning systems used frequently throughout the manufacturing community.

It consists of a PLS4 power supply, Model 410 servo controller, mounting rack, programming terminal and AC servo motor.

This system is set up to test a wide range of communications interfaces and has special programs written to ensure a proper and quality repair.

Multiple variations, revisions and sizes of 410 servo drives can be fully closed loop tested with this K+S diagnostic system!

12 Month In-Service Warranty

All Units Are System Tested

No Charge Evaluation
